About TLC

OUR MISSION:

The Ty Louis Campbell Foundation is a nonprofit organization (EIN: 45-1858390) that funds innovative research and clinical trials specifically geared toward the treatment of the most aggressive childhood cancers. Our mission is to help fund the intelligence and technology that will improve long-term survival rates and minimize side-effects for children diagnosed with the deadliest cancers, while helping to care for families when their child is in treatment by providing financial assistance and uplifting experiences.

OUR REASON:

Pediatric cancer is the number one cause of death by disease among children. It doesn't discriminate. It happens at random sparing no ethnic group, socio-economic class or geographic region. There is no known cause or prevention for most childhood cancers. Pediatric cancer patients are robbed of their childhood while fighting this disease, and the majority of those who survive treatment (65%) suffer from serious long-term and chronic side effects. Outcomes for children need to improve, and we aim to make this a priority among researchers and pharmaceuticals.

OUR INSPIRATION:

We call him SuperTy because he was our little hero. Ty Louis Campbell graced this earth for five beautiful years, and before he left he made it a better place to live. He made an astounding impact on all who heard his story. He inspired a community to make the most of their lives and to rally against childhood cancer by raising awareness. For Ty, we will uncover better treatment options for children. Effective treatments that work without robbing children of their childhood.

OUR RESEARCH IMPACT:

With your help, TLC funds projects that hold the promise of transforming the standard of care for the most aggressive cancers that are unique to children, with a strong (but not limited) focus on brain and spinal cord malignancies. Everyone at TLC feels a tremendous responsibility toward making sure our efforts positively impact children who are in treatment today. In addition to a dedicated team of researchers and medical advisors who advise us on investments, we have partnered with powerful institutions who are making tremendous strides toward better treatment options for childhood cancer.
